**Objective:** How do I connect to the NYIT Wi-Fi Network using Microsoft Windows?

Step 1: Locate your wireless signal strength icon and double-click on it.

Step 2a: Click on the NYIT Wi-Fi Network.

Step 3: Open a Browser session.

Step 4: You must Read and acknowledge the NYIT Code of Responsible Technology usage agreement.
Step 5: Log in using your NYIT User name and Password

Step 6: Choose the applicable agent
Step 7: Select Run.

Step 8: The dissolvable agent will install and verify that your computer meets NYIT’s standards
- Windows machines must be Windows XP or higher and have a virus scanner with recent definitions.
- Macs must be OSX 10.4 (Tiger) or higher
- All other devices (handhelds, game consoles) do not require the agent scan.
Step 9: Successful Wi-Fi connection

Step 10: Clear your browser cache and restart.
Step 11: Open a new browser session.
