1. When you first turn on your iOS device, you'll see a screen displaying Hello in different languages. Slide from left to right anywhere on this screen.

2. Select the language you want your iOS device to use, and then the region in which you'll be using your iOS device. This will affect things such as date, time, and contact formatting.
日本語
3. Your iOS device requires an Internet connection to set up. Tap the name of your desired Wi-Fi network to begin device activation.
If you're activating an iPhone or iPad (Wi-Fi + Cellular) with active cellular service, you can instead choose cellular activation.

Choose a Wi-Fi Network

WiFi

Choose another network

Use Cellular Connection

Set up your iPhone using cellular data if your Wi-Fi network is not available.
4. Choose whether to enable Location Services.

Location Services

Enable Location Services

Disable Location Services

What is Location Services?
Location Services allows apps like Maps and services like Spotlight Suggestions to gather and use data indicating your approximate location.

About Location Services

5. Set up your iPhone as a new device, from an iCloud backup, or from an iTunes backup.
If restoring from backup, you can learn how to restore your content.

Set Up iPhone

Set Up as New iPhone

Restore from iCloud Backup

Restore from iTunes Backup

What does restoring do?
Your personal data and purchased content will appear on your device, automatically.

6. Sign in with your Apple ID, which you’ve created previously, or create a free Apple ID.

• Alternatively, you can tap Skip This Step to sign in or create an Apple ID later.
If necessary, learn how to create a free Apple ID:
1. Select your birthday, then tap Next:

Birthday

Your birthday is used to determine appropriate services and retrieve your password if you forget it.

</tr>
</tbody>
</table>
2. Enter your first and last name, then tap Next:

First Name: John
Last Name: Appleseed

3. You can then use either your current email address, or choose to get a free iCloud email address. Select the option you'd like, then tap Next.

4. Enter your current email address, or what you'd like for your iCloud email, then tap Next.
5. Enter what you'd like for your password and tap Next.

6. Enter your security questions and answers, tapping Next after each.

7. If you like, enter an alternate email address to be used as a "rescue email". Tap Next after you have done so, or if you chose not to use one.

8. Select whether you’d like email updates and tap Next.

7. If you agree to the terms and conditions of your iOS device, tap Agree.
8. Choose whether to upgrade your iCloud account to use iCloud Drive. This allows you to store your files in iCloud and access them anytime on all your devices. iCloud Drive requires iOS 8 and OS X Yosemite. If you upgrade your account, any documents currently stored in iCloud will move to iCloud Drive. You'll be
able to access them only from devices with iOS 8 or Yosemite.

---

**iCloud Drive**

Store your files in iCloud and access them anytime on all your devices.

**Note:** You will not be able to access the documents currently stored in iCloud on your other devices until they are also upgraded to iOS 8 or OS X Yosemite.

**Upgrade to iCloud Drive**

**Not Now**

**About iCloud Drive**

Make edits on any device or any app,
9. With an iCloud account set up on your device, you can use Find My iPhone.
10. Set up iMessage and FaceTime on your device.
11. With iPhone 5s and later, you can set up Touch ID to use your fingerprint in place of your passcode or Apple ID password for purchases.

12. To protect your data, you should create a passcode for your device. You'll use it to unlock your device. If you don't need a passcode, tap Don't Add Passcode.
   • If you choose to use Touch ID, you must enter a passcode.
   • To make sure you did not make a mistake, you need to enter your passcode twice.
   • If you chose a commonly used passcode, you'll be asked to choose a more secure one.
If you need to use a complex passcode, you can set it in Settings > General > Passcode after completing this assistant.

Create a Passcode

A passcode protects your data and is used to unlock iPhone.

Don't Add Passcode

13. Set up **iCloud Keychain**.

### iCloud Keychain

To set up iCloud Keychain on this iPhone, approve it from one of your other devices using iCloud Keychain or use your iCloud Security Code.

- **Approve from Other Device**
- **Use iCloud Security Code**
- **Don’t Restore Passwords**

**About iCloud Keychain and Privacy**

14. Choose whether to use Siri.
You can learn more about Siri by scrolling to the bottom of the screen and tapping, About Siri, or by visiting about Siri.

Choose whether to allow Apple to share App Analytic data with app developers.
• If you change your mind, you can change this any time at Settings > Privacy > Diagnostics & Usage.
- For more information about diagnostics and usage, tap About Diagnostics and Privacy, or read about Apple's customer privacy policy.
App Analytics

Share with App Developers

Don't Share

About App Analytics
Help app developers improve their apps by allowing Apple to share crash data as well as statistics about how you use their apps with them.

About App Analytics and Privacy
16. With iPhone 6 and iPhone 6 Plus, you can choose between two display resolutions: standard and zoom. Use **Display Zoom** to choose how you'd like to view your iPhone. Standard fits more on the screen. Zoom shows larger text and controls.

**Display Zoom**

Choose how you would like to view iPhone. Zoomed shows larger text and controls. Standard fits more on screen. You can change this at any time in Settings.

**Choose a View**

- STANDARD
- ZOOMED
Congratulations on setting up your iOS device! Tap Get Started to begin.
